Pedagogical Activities (Teaching, Training, Mentoring, Program Development)

I teach a graduate course in Psychiatric Epidemiology, which devotes significant attention to substance use disorders and psychiatric co-morbidities. I also teach a graduate seminar for doctoral students in public health that focuses on career development, job opportunities, grant writing, publication ethics, research integrity and the responsible conduct of research.

Courses Taught

- 1968-1970 Graduate Teaching Instructor, Department of Psychology University of Arizona; Taught General Psychology, Social Psychology and Systems and Theories of Psychology
- 1972-1977 Instructor, Department of Psychology and Sociology, Wheelock College, Boston, Massachusetts; Taught Social Problems, Theories of Personality and Abnormal Psychology
- 1986-1992 Elective Seminar, Alcoholism: Biomedical and Psychosocial Perspectives Epidemiology Conference, Basic Sciences Curriculum, School of Medicine
- 2002 Course Director, Graduate Program in Public Health, Taught Psychiatric Epidemiology; Mental Health and Substance Abuse Treatment Systems; Doctoral Proseminar in Public Health; Advanced Topics in Social and Behavioral Foundations of Public Health, Clinical and Health Services Research on Substance Use Disorders; Research Careers and the Responsible Conduct of Research in Alcohol and Addiction Science; Clinical and Social Service Systems Research in Alcohol and Addiction Science

Training Programs

I have developed several training programs with funding from the National Institute on Alcohol Abuse and Alcoholism (NIAAA), the National Institute on Drug Abuse (NIDA), the World Health Organization and the Pan American Health Organization. NIDA and NIAAA have supported the development of an online tutorial based on the second edition of the book, Publishing Addiction Science (Babor et al., 2008). I led the development of training programs in publication ethics and research integrity, much of the work summarized in the third edition of Publishing Addiction Science (Babor et al., 2017, Ubiquity Press). The tutorial deals with research integrity and publication ethics, and is available without cost at <http://www.parint.org/tutorial.cfm>. WHO has supported the development of tutorials for the AUDIT and ASSIST screening tests, which are available on the PAHO website

(http://www.paho.org/hq/index.php?option=com_content&view=article&id=8826&Itemid=2&lang=en)
I also developed a course for the same virtual campus in alcohol and drug policy.

Recently, I developed the Certificate in Addiction Science (CAS), an online graduate certificate within the Graduate Program in Public Health at the University of Connecticut School of Medicine. The four courses were developed under a R25 grant funded by the US National Institute on Alcohol Abuse and Alcoholism (TF Babor, PI/PD, 2016-2018). The courses are designed to promote clinical, epidemiological and policy research on alcohol. The courses are: 1) Research Careers and the Responsible Conduct of Research in Alcohol and Addiction Science; 2) Epidemiology of Substance Use Disorders and Psychiatric Co-morbidities; 3) Clinical and Social Service Systems Research in Alcohol and Addiction Science; 4) Alcohol and Drug Policy.

Mentoring Activities

During my career, I have served as the primary supervisor of six masters student thesis projects and four doctoral dissertations. I also mentored 11 postdoctoral fellows, and I have served as the opponent of a doctoral dissertation at Karolinska Institute in Sweden. The names of these students and fellows are listed below, along with related information.
